The finest in bespoke garden structures

Beautiful designs from traditional construction

Our family business is located in the heart of the Lancashire countryside.
We pride ourselves on our personal, thoughtful customer service
and our traditional construction methods.

We can design and create any size, shape and style of garden building you require, allowing it to fit effortlessly in to your garden. It may be a small covered seat for a spot of outside reading, a summerhouse or garden room for your craft studio, potting room or office away from the home. It may be a gazebo for you to relax and dine in on summer days.

Whatever your design idea, we can help turn it in to a beautiful structure, that you will be able to enjoy for many years to come.

Best wishes

Stan Fairbrother

THE RANGE

Seven stunning garden structures designed to encompass our signature styles & most popular designs.

THE ALSTON

A stunning single skin summerhouse with traditional shingle roof & clear toughened glass.

THE DERWENT

*Our most popular summerhouse.
A six sided single skin summerhouse with French doors, constructed with traditional shingle roof & clear toughened glass.*

THE DALTON

*A spacious single skin summerhouse with fully opening bi-folding doors leading on to a timber balcony.
Constructed with a traditional shingle roof & clear toughened glass.*

THE BORROWDALE

A beautiful single skin corner summerhouse constructed with traditional shingle roof & clear toughened glass.

THE HARRINGTON

A stunning eight sided summerhouse with french doors & windows to four sides.

THE KENTMERE

*Our most popular of the larger summerhouses.
This eight sided summerhouse is spacious and grand. Constructed with a traditional shingle roof & clear toughened glass.*

THE SILVERDALE

The only gazebo in this beautiful range, the Silverdale is the perfect outdoor entertaining space.

BESPOKE SERVICE

We can create any size and style of structure to make the most of the space available in your garden. You may have a design already in mind or you may like to take some inspiration from a selection of our work...

THE DETAILS

Personalise your structure to suit your style and needs. You can choose many of the finishes for your structure, including; roof and window finishes, insulation, painting, storage, provision for wood burners, electrics and water supplies. When you order your structure, you'll be able to discuss your requirements with Stan.

PLACING AN ORDER

We reserve time in our Lancashire workshop to create your building on a first-come-first-served basis, which allows us to focus entirely on your structure. We work to an estimated lead-time of twelve to fourteen weeks. Once complete and onsite your garden building will be ready to enjoy in days, not weeks. We will ensure there is no disruption to your home and our small team of craftsmen will hand finish all elements in situ to ensure a perfect fit.

In many cases planning permission is not required for our structures. We will be able to give you advise and direct you to the planning portal if you have any queries. We will also advise on groundwork and base requirements for your structure, which we ask is in place before our arrival on site.

We recommend reading our aftercare page on our website, for details of what to expect from your structure as it settles in your garden. This page also has useful suggestions on design choices to make sure your finished structure looks just how you picture it.

You can view this on our website.

To discuss your structure please feel free to call Stan directly at the workshop on 01772 814274 or email stan@stanfairbrother.co.uk

*You can find more information and inspiration
for your structure on our website*
